Modular Cart Drawer System

Caregivers have asked for a robust locking system on a non-powered cart. Cygnus answered with a rechargeable battery-powered lock which can control multiple drawers on a non-powered computer cart.

As a modular unit, the drawer system can be added to any of the Northport carts by Cygnus. The drawer system is also completely compatible with Howard™ carts.

System Benefits:

Battery-powered, push button or proximity card lock system

Adjustable bin configuration

Smooth action, ball-bearing drawer slides

One, two or three drawer options

Approximately 16 pounds

Custom configurations available

Cygnus offers the industry's only powered lock on a non-powered cart.
